FINANCIAL HIGHLIGHTS

The above graph shows the performance of the Company in the last five years through its sales and Earnings before Interest, Depreciation and Amortization. The graph reflects the growth of the Company which is going upwards year over year and thus shows the commitment of the Company to grow high. With total operational revenue at ₹ 304.12 crores and EBITDA of ₹ 42.69 crores, the Company have been able to post a considerable growth of 16.78 % and 75.02 % respectively.

Chairman's Message

Dear Shareholders,

It gives me immense pleasure to share with you that the financial year 2017-18 has been an eventful year for the Company and has given us the turnover crossing ₹. 300.00 crores.

In the financial year 2017-18, the Company has reached total revenue of ₹. 307.06 crores over ₹. 261.85 crores in the previous year and net profit of ₹. 1602.17 lakhs over ₹. 901.06 lakhs in the previous year, respectively. The EBITDA growth of the Company was 75.02%. The growth of the Company was mainly attributed to the performance of the Criticare & Criticare Life and Infertility division. During the year under review, your Company launched around twenty new products and made continuous efforts for improvising the existing products.

The implementation of GST in July 2017 had also impacted the financial position of your Company, which is reflected in the results of the first quarter of FY 2017-18. In the recent past, the pharma industry also experienced slow growth rate due to implementation of new Government policies and control measures. Also, the increase in demand of regulatory and compliance issues, globally, has challenged the growth of the pharma sector. Despite of the challenges faced by the Company, your Company strives to give its best performance year over year.

Your Company received two new patents viz., Micafungin and Rifabutin in the year under review. We have started the process of filing the said patents in other countries as well, having market value for the product.

Gufic is well known and respected for Innovative and high Quality pharmaceutical and Herbal Products along with a wide range of APIs and our core competency also lies in manufacturing and marketing top end lyophilized injectable antibiotics at an affordable prices. We have penetration to more than 123 leading hospitals. As on date, your Company is having five divisions viz., Healthcare, Spark, Criticare, Criticare Life and Ferticare which caters to the needs of the people. We are in the process of expanding our business and stepping into oncology and dermatology in the near future.

We continue our journey of excellence by investing in our growth drivers that will steer future success and we strive to fulfill our aim of achieving leadership in the specialized medicinal segments and make products available at a cost-effective rate using innovation and technology to enhance the welfare of the population worldwide.

Looking ahead, we will continue to focus our efforts on the specialized area of Lyophilized injections & API's and to contribute to society.

We kindly ask for the continued support of all our stakeholders.

Yours faithfully,
For Gufic Biosciences Limited

Jayesh P. Choksi

MANAGEMENT DISCUSSION AND ANALYSIS

a) Industry Structure And Developments

Indian Pharma Industry – an overview

Globally, the largest provider of generic drugs is India which accounts for 20% of the global exports in terms of volume. Around 70 to 80 % of the Indian pharmaceutical market are dominated by the branded generics. By 2022, India is likely to be the 9th largest market globally in absolute size. India enjoys an important position in the global pharmaceuticals sector. The country also has a large pool of scientists and engineers who have the potential to steer the industry ahead to an even higher level. Presently over 80% of the antiretroviral drugs used globally to combat AIDS (Acquired Immuno Deficiency Syndrome) are supplied by Indian pharmaceutical firms.

The Indian pharmaceuticals market witnessed growth at a CAGR of 5.64%, during FY11-16, with the market increasing from US\$ 20.95 billion in FY11 to US\$ 27.57 billion in FY16. The pharmaceutical sector was valued at US\$ 33 billion in 2017. Indian pharmaceutical market grew 5.5% in CY2017 in terms of moving annual turnover. In March 2018, the market grew at 9.5% year-on-year with sales of ₹ 10,029 crore (US\$ 1.56 billion). By 2020, India is likely to be among the top three pharmaceutical markets by incremental growth and 6th largest market globally in absolute size. Increase in the size of middle class households coupled with the improvement in medical infrastructure and increase in the penetration of health insurance in the country will also influence in the growth of pharmaceuticals sector.¹

Indian pharma companies are capitalising on export opportunities in regulated and semi-regulated markets. The Government of India plans to set up a US\$ 640 million venture capital fund to boost drug discovery and strengthen pharmaceutical infrastructure. The 'Pharma Vision 2020' by the government's Department of Pharmaceuticals aims to make India a major hub for end-to-end drug discovery.²

The government's vision of starting insurance for the general public if executed well can be a good shot in the arm for the domestic industry as it will increase access to affordable quality medicines.

The Goods and Service Tax had both negative and positive impacts on this industry. GST has subsumed all the previous indirect taxes, including the service tax, with a single tax system. Also, there is no Central Sales Tax in GST which reduces the assembling and storage costs for medical companies. The cost of life-saving treatments has increased under GST, thus directly impacting the budget of the common man. Even though it helps to make the tax system less complex and prompts business growth in this sector, the common individuals are not very happy with the increased burden of healthcare on their pockets.

Increase in the size of middle-class households coupled with the improvement in medical infrastructure and jumping the penetration of health insurance in the country are expected to boost domestic demand for pharmaceutical products. India's focus on providing complex and speciality products, customer centricity, regulatory compliance, quality improvement and operational efficiency are expected to enhance exports.

Pharma Sector Overview – Global

The pharmaceutical industry is developing at an unusually rapid pace. Manufacturing companies are confronted with enormous challenges due to high market growth, new medicines and therapy forms, changing regulations and progressing digitization.

The total global spends for pharmaceuticals through 2021 will increase by \$367 billion on a constant-dollar basis, according to Quintiles IMS. Spending is measured at the ex-manufacturer level before adjusting for rebates, discounts, taxes and other adjustments that affect net sales received by manufacturers. The impact of these factors is estimated to reduce growth by \$127 billion, or approximately 35% of the growth forecast through 2021.

The global spending growth will mainly increase in developed countries due to innovations in oncology, Auto-immune an diabetes treatment. As per market study, developed market spending growth will be driven by original brands while pharma emerging markets will continue to be fueled by non-original products that make up an average 91% of pharmerging market volume and 78% of spending. Specialty medicines are projected to increase their share in

GUFIC BIOSCIENCES LIMITED

globally, particularly in developed markets. Specialty medicines' share of global spending has risen to less than 20% ten years ago to 30% in 2016 and to 35% by 2021, approaching half of total spending in US and European markets, according to the study.

The growth of pharmaceutical market is improving year on year. As per the Quintiles IMS Institute, expenses for drugs will amount to 1.5 trillion U.S. dollars globally in 2021 that equals to an average annual growth rate of between four and seven percent in medication expenses or three percent in doses. The actual reason for the growth is the increase in population. The proportion of people aged 65 to 80 years in 2030 will be high by 6-7% as compared to the people in 2000. Increasing urbanization, population, pollution and work stress would lead to increase in diseases and thus making drugs available and affordable for more people and higher demand for medication. According to the 2017 World Preview report of Evaluate Pharma, prescription drug and OTC sales are forecast to grow at an impressive compound annual rate of 5.4%, rising from US\$ 803 billion in 2016 to US\$ 1.1 trillion worldwide in 2022.

According to the 2017 World Preview report of Evaluate Pharma, prescription drug and OTC sales are forecast to grow at an impressive compound annual rate of 5.4%, rising from US\$ 803 billion in 2016 to US\$ 1.1 trillion worldwide in 2022.

Market of Interest for Gufic

Gufic foresees the healthcare business in India changing. Trade will always be the majority but at the onset of a lot of investment in Hospitals especially in tier 1 and 2 towns, the healthcare channel for the people will be serviced via speciality centres, nursing homes or primary, secondary and tertiary hospitals. Also medical tourism being on the rise, this channel will be more prominent in the years to come. Gufic would like to forge a strength in this channel as a specialty healthcare provider and via a launch of a new division every year provide a complete basket of medical needs.

Also Gufic expects that the healthcare market in the Africa (Kenya, Nigeria, Tanzania, Egypt and Francophone) South east Asia, CIS, South Africa, Australia, Canada and Middle East will mature a lot and apart from generics, a market will open for high end lifesaving products which is a great opportunity to be targeted. Gufic via its innovation would like to provide high end injections to these markets at a fraction of the price thereby making the treatment affordable and increase access to a higher base of population.

Apart from above Gufic's export growth is expected to be led by increasing generic penetration in the regulated markets Like Europe, UK, Canada, Australia, Brazil, Russia and South Africa on the back of enhanced focus on the niche and complex product segments, targeting molecules where patents are expiring and enabling licensing agreement with pharmaceutical companies.

In the financial year 2017-18, Gufic developed and launched about 20 new products and expects to launch more than 28 products in the next financial year. With the amalgamation of Gufic Stridden Bio-Pharma Private Limited being effective in this year, subject to approval of the regulatory authorities, door to more export countries will get open for Gufic. However, Gufic's main focus shall always lies with the domestic market.

OPPORTUNITIES AND CHALLENGES

The pharmaceutical industry is one of the biggest and fastest growing industries in India as well as abroad. The Indian pharmaceutical market size is expected to grow to US\$ 100 billion by 2025, driven by increasing consumer spending, rapid urbanization, and raising healthcare insurance among others.

The Government of India to create opportunities for Indian Pharma Sector has taken many initiatives such as starting a single window facility to provide consents and approvals to give a push to the Make in India initiative, unveiling of "Pharma Vision 2020" that aims at making India a global leader in manufacturing of pharmaceutical products and introduced mechanism to deal with the issue of affordability and availability of medicines.

With rising income levels, growing health awareness and better access to healthcare, emerging markets offer significant growth potential for the pharmaceutical industry. In recent times, there is an increase in occurrence of non-communicable diseases such as cardiovascular illnesses, diabetes, and oncologic disorders. It is estimated that incidence of diabetes and on cologic diseases will grow by around 20% by 2030.

India is among the leaders in the clinical trial market. Due to a genetically diverse population and availability of skilled

doctors, India has the potential to attract huge investments to its clinical trial market. From 2009 to 2015, 3043 clinical trial has been carried out in India. As of June 2017, the Clinical Trials Registry – India had 8,950 trials registered. Due to increasing population and income levels, demand for high-end drugs is expected to rise. Growing demand could open up the market for production of high-end drugs in India. With 70 per cent of India's population residing in rural areas, pharma companies have immense opportunities to tap this market. Demand for generic medicines in rural markets has seen a sharp growth. Various companies are investing in the distribution network in rural areas³.

By Goods and Service Tax coming into picture, the growth of the Indian pharma company staggered in the first quarter of its implementation which brought a big challenge to the pharma company, however seen from a long run basis, the single tax system shall provide as an opportunity to the industry as well as shall bring availability and affordability to general public.

The Indian Pharma sector faces uncertainty in generic pricing. According to a study, The profit margins of Indian pharma industries which are selling generics in the United States will remain in pressure in 2018 with channel consolidation and USFDA fast tracking approvals through Generic Drug User Fee Act (GDUFA). Also compliances of current good manufacturing practices (cGMP) by USFDA are a challenge. The Indian pharma company selling in US shall comply with the cGMP and any non-compliance would lead to loss of market value, fresh approvals getting stuck and cost of remediation.

Another challenge faced by the Indian Pharma is that expectation of higher level of compliance of FDA at sterile manufacturing facilities (vs. orals) and this has manifested in several aseptic processing observations. Many do believe that a combination of prevailing hygiene culture and rising quality benchmarks have led this segment to be a difficult proposition. However, given the healthy product margins, most still remain committed to the longer term.

EXPORT MARKET

As per the survey, India accounts for 20 per cent of global exports in generics. India's pharmaceutical exports stood at US\$ 16.84 billion in 2016-17 and are expected to reach US\$ 20 billion by 2020. As per the survey, India exported pharmaceutical products worth ₹. 549.56 billion (US\$ 8.49 billion) during the period of April to November 2017. India is the largest exporter of formulations in terms of volume, with 14 per cent market share and 12th in terms of export value and around US\$ 9.57 billion drug formulation were exported from India during April – December 2017.

As per ASSOCHAM report, the drugs exported by India to USA is worth USD 1.65 trillion which shall increase at a compounded annual growth rate of about 30%. This growth is based on several patented drugs going off-patent in USA over the next few years. However, intensification of competition in generics resulting in price erosion, frequent regulatory scrutiny leading to slowdown of exports and channel consolidation impacting manufacturers' ability to charge higher prices are the current challenges being faced in this market.

Over the last five years on an average Indian Pharma companies have bagged over one third of the total USFDA ANDA (Abbreviated New Drug Approvals) approvals. During CY2016 Indian Pharma companies have managed to secure US FDA final approval for 201 ANDAs out of the total 598 approvals granted by the health regulator of the country. Despite the increasing competition in the U.S. generic market and the increased due-diligence by the health regulator, Indian Pharma Inc. has managed to secure a dominant position, on the back of the increasing R&D investment.

The share of the exports from India towards the highly regulated markets (including USA and UK) has increased to 36% during FY16 (FY15: 31%) which shows the competency of the Indian Pharma companies and the improving compliance aspects with highly regulated markets.

Research & Development (R&D)

The company has a full-fledged R&D division continuously engaged in research on new products and process improvement on existing products as part of continuous improvement. Gufic's R & D team believes in continuous advancement via innovation and it focuses on developing new products using new formulations, updating and improving the processes used for existing products, strategic collaboration with independent teams for introducing new products and strategies, developing and focusing new technologies for enhancing efficacy, bio-availability and the potency of the existing as well as new products. The Company in the recent years has filed multiple Process Patents

GUFIC BIOSCIENCES LIMITED

for many life-saving drugs injections and also for herbal treatment for chronic ailments. In the financial year 2017-18, Company has received two process patents on its invention on formulation viz., Micafungin and Rifabutin.

In the financial year 2017-18, the Company inter alia developed patient friendly formulations for the convenience of the patients, developed Oral dosage form like tablets, capsule. R&D is also engaged in development of External preparation and major parenteral products using new molecules. The total investment made by the Company in its R & D division during the financial year 2017-18 amounted to ₹. 528.82 lakhs.

Gufic's collaboration with companies in USA, Italy and China has given Gufic a strong pipeline to fuel the growth for the next decade. We foresee entering in the field of cosmetics, immune-oncology, diabetes and Neuropsychiatry in the years to come.

Also keeping in mind the trade conditions prevailing in the market, Gufic has started focusing in backward integration for our core molecules via in house or leased API plants. This will ensure Gufic stays competitive and self reliant in times global trade uncertainty.

Government Initiatives

The Government of India unveiled 'Pharma Vision 2020' aimed at making India a global leader in end-to-end drug manufacture. Approval time for new facilities has been reduced to boost investments. Further, the government introduced mechanisms such as the Drug Price Control Order and the National Pharmaceutical Pricing Authority to deal with the issue of affordability and availability of medicines.

The Union Cabinet has approved the amendment of the existing Foreign Direct Investment (FDI) policy in the pharmaceutical sector in order to allow FDI up to 100 per cent under the automatic route for manufacturing of medical devices subject to certain conditions. The drugs and pharmaceuticals sector attracted cumulative FDI inflows worth US\$ 15.59 billion between April 2000 and December 2017, according to data released by the Department of Industrial Policy and Promotion (DIPP).

Some of the major initiatives taken by the government to promote the pharmaceutical sector in India are as follows:

- The government is planning to set up eight mini drug-testing laboratories across major ports and airports in the country to monitor the standards of imported and exported drugs and reduce the overall time spent on quality assessment.
- The government is working on steps to reduce India's dependence on large scale import of active pharmaceutical ingredients (APIs). The government is quite seized of the issue of the country's dependence on import of API
- Initiative of Make in India by the Drug Controller General of India (DCGI) by starting a single-window facility to provide consents, approvals and other information.
- The health ministry is planning to set up an online portal to regulate and plug gaps in the sale of medicines in India through all platforms, including e-pharmacies. The objective of such regulation would be to ensure availability of right drugs that meet the standards of quality to every person in need of medicines, curbing anti-microbial resistance and also regulating supply of medicines through online/internet. The ministry proposes to establish a 'robust e-enabled' structure to regulate the sales of medicines through an autonomous body.

Since Gufic focuses mainly of high end injectables and life saving molecules, majority of our products do not fall under the scheme. However in the interest of the people of India and our honorable Prime ministers vision, we continue to use our innovative strengths to bring down the cost of our drugs at a fraction of the prices in the market and help the mass population avail the benefit via affordability of the best quality medicines.

BUSINESS REVIEW

Over the past many years, Gufic has been known and respected for innovative and high quality pharmaceutical and herbal products along with a wide range of Active Pharmaceutical Ingredients (APIs). Gufic is one of the largest manufacturers of Lyophilized injections in India and have a fully automated lyophilization plant. Its lyophilized product includes Antibiotic, Antifungal, Cardiac, Infertility, Antiviral and proton-pump inhibitor segments. Gufic is now augmenting its global focus by deepening its presence in the priority markets of India, Germany, Switzerland, South Africa, Russia, Europe and key countries within the emerging market territories. Gufic aims at providing lifesaving

drugs to people at affordable prices with no compromise in its quality.

GUFIC offers a varied therapeutic basket in its Bulk drugs/API division. The categories of API's manufactured are antifungals, antibacterials, anesthetics and intermediates for antifungals

Gufic continued to outperform in the domestic market in the financial year 2017-18. While the implementation of GST in the year under review did impact the performance of the Company in the first quarter, but the Company's focus and aim enabled it to transition seamlessly to the new tax regime. The Company launched 20 new products, improvised many of its existing products through its R & D Division.

Financial performance with respect to operational performance:

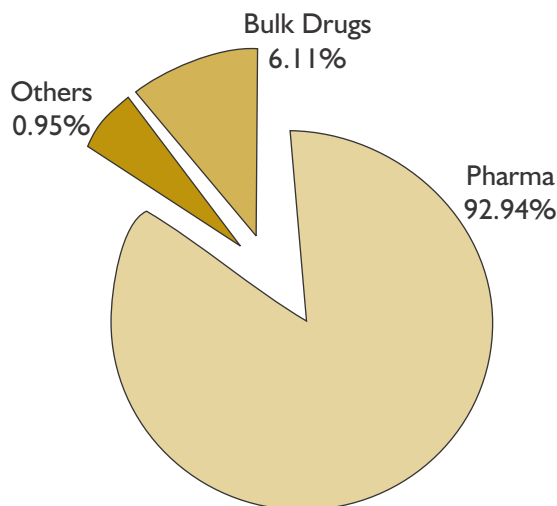

During the year under review, the total revenue increased to ₹. 30,706.26 lakhs in comparison to previous year's ₹. 26,185.80 Lakhs and net profit after tax increased to ₹. 1602.17 lakhs from ₹. 902.08 lakhs, in previous year. The domestic sales of the Company constituted to around 94% of the operational revenue and the balance 6% constituted to export turnover.

The Company, during the year, also launched about 20 new products in the market, which also boosted the sales of the Company. Due to launch of new products, improvisation made to the existing products and providing medicine at affordable prices to the consumer without compromising on the quality of the product, the Company has able to achieve the target of achieving a turnover of ₹. 300.00 crores. The growth of the Company was mainly attributed to the performance of the Criticare & Criticare Life and Infertility. During the year under review, the total expenses of the Company increased by 12.78%.

SEGMENT WISE PERFORMANCE

The turnover of the Company for the financial year 2017-18 increased by 17.26%. As on March 31, 2018, The sales of the pharma segment of the Company was ₹. 28537.24 lakhs and that of bulk drugs was ₹. 1874.72 lakhs. The Company did not operate in consumer segment during the year under review.

HUMAN RESOURCES DEVELOPMENT

“You can have the best strategy and the best building in the world, but if you don’t have the hearts and minds of the people who work with you, none of it comes to life.”

– Renee West

The backbone of any successful company is its Human Resource (HR). Employees as rightly said are the Company's most important and valuable assets. HR of Gufic has its complete focus on organizational development and employee engagement. Gufic is built on the strong foundation of its people. The performance of the Company has a direct relationship with that of the performance of its employees.

Bearing the above in mind, Gufic has always strived to achieve the best for its employees. The Company, on a regular basis, organizes social gatherings, outings, celebration of special days, employee performance based awards to motivate the employees. The Company also take into consideration the health of the Company by taking medi-claim policies of the employee along with their dependent family member. Also, your Company have sponsored its employees for specialized educational courses, seminars and programmes to enhance their knowledge and skills in the areas of their expertise.

Gufic gives its employees a work culture that motivates people to give their best performance for the Company's growth and also enhance their skill sets. Gufic always believes in team spirit and focus on enhancing the same. The employees have helped the Company to scale new heights and success over the years. No material developments in Human Resources/ Industrial Relations front have occurred during the year under review.

During the year under review, the employees' strength of your Company increased to 1060 as compared to 1023, in the previous year.

Internal Control Framework

At Gufic, we continuously strive to integrate the entire organisation from strategic support functions like finance, information technology, human resources, and regulatory affairs to core operations like research, manufacturing and supply chain. The internal audit function is further strengthened in consultation with Statutory Auditors for monitoring statutory and operational issues.

The internal controls and governance process are duly reviewed for their adequacy and effectiveness through periodic audits by the Internal Auditors of the Company. The issues relating to the working of the internal financial control of the Company, reported by the Auditors are addressed and looked upon, from time to time. Gufic assures maintenance of a system that provides reasonable assurance regarding the effectiveness and efficacy of operations, adequacy of safeguarding of assets, preventions and detection of frauds and so on.

Gufic has changed our ERP system in July 2017 to cope with the post GST regime and also meet international regulatory requirement. The implementation of the same had its own challenges in the previous year and due to the committed effort of the implementation team, we will get the benefit of the system from this year onwards.

Outlook

Of late, consolidation has become an important characteristic of the Indian pharmaceutical market as the industry is highly fragmented. The Indian pharmaceutical market is expected to grow exceptionally by 2025 on the back of increasing consumer spending, raising healthcare insurance and rapid urbanization. Government effort steps to reduce costs and bring down healthcare expenses too will help the sector in coming time. Moreover, government's steps to reduce India's dependence on large scale import of active pharmaceutical ingredients and increasing production of active ingredients used in drugs to meet the country's need also augurs well for the pharmaceutical companies. Significant increase in exports and well controlled imports will also provide strength to the sector, supported by government's several initiatives to boost exports and domestic production. Moreover, higher spending on research and development by pharmaceutical companies too will support the sector in coming time.

Threats, Risks & Concerns

The risk and concerns is associated with the pharmaceutical industries both in India and internationally with the volume and complexity of change having greatly intensified the implication of risk. Be it regulatory risk, competitive risk, new product developmental risk or litigation risk, pharma sector is associated with many concerns. The Union Health Ministry in India plans to amend the Drugs And Cosmetics Act and make prescription of generic medicines mandatory. This change will definitely help people to buy medicines at affordable price but at the same time is a challenge for pharma industry to ensure access and affordability of medicines without compromising on its quality.

Gufic has a risk management policy in place which is reviewed by the Board from time to time. The Board of Directors of the Company are involved in monitoring of risk assessment and mitigation, thus ensuring immediate resolution mechanism. The Company has a work philosophy of doing business with high ethical standards and topmost integrity. The Management has identified many risks such as business risk, competition risk, price risk, international operational risk, financial risk etc. The Board has made its best efforts to mitigate the risk concerning the company if the risk cannot be eliminated. Some of the steps adopted by the Company to mitigate the risk can be enumerated as below :

- Deriving revenue from products at different locations all over the world, in case the product does not do well at one location
- Meeting the challenges of competition by providing customers with product quality, timely supplies and following best industrial practices in providing services.
- Working on cost control, improving yields etc., to maintain the profit margin
- Insurance cover from reputed insurance companies to keep insured the products, properties and its employees

CAUTIONARY STATEMENT

Certain statements in the Management & Discussion Analysis describing the Company's objectives, goals, current expectations or projections may be 'forward looking statements' within the definition of applicable laws and regulations in force. The results of the statement may vary due to the risk and uncertainties involved with these statements. These risk factors include but are not limited to changes in local and global economic conditions, volatility of interest rates, new Governmental regulatory policies, the market acceptance of and demand for the product and the Company's ability to implement the strategy.

We'll close this section of our annual report with a quote from William Ford Jr. who said, "A good company delivers excellent products and services, and a great company does all that and strives to make the world a better place." Through our various initiatives, we at Gufic hope to become and remain a part of the latter category for many more decades to come.

The Members of Gufic Biosciences Limited

1. Report on the Standalone Ind AS Financial Statements

We have audited the accompanying standalone Ind AS financial statements of **Gufic Biosciences Limited** ("the Company"), which comprise the Balance Sheet as at March 31, 2018, the Statement of Profit and Loss including the statement of Other Comprehensive Income, the Cash Flow Statement and the Statement of Changes in Equity for the year then ended, and a summary of the significant accounting policies and other explanatory information.

2. Management's Responsibility for the Standalone Financial Statements

The Company's Board of Directors is responsible for the matters stated in Section 134(5) of the Companies Act, 2013 ("the Act") with respect to the preparation and presentation of these standalone Ind AS financial statements that give a true and fair view of the financial position, financial performance including other comprehensive income, cash flows and changes in equity of the Company in accordance with the accounting principles generally accepted in India, including the Indian Accounting Standards (Ind AS) specified Section 133 of the Act, read with the Companies (Indian Accounting Standards) Rules, 2015, as amended. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the Ind AS financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

3. Auditor's Responsibility

Our responsibility is to express an opinion on these standalone Ind AS financial statements based on our audit. We have taken into account the provisions of the Act, the accounting and auditing standards and matters which are required to be included in the audit report under the provisions of the Act and the Rules made thereunder.

We conducted our audit of the standalone Ind AS financial statement in accordance with the Standards on Auditing, issued by the Institute of Chartered Accountants of India, specified under Section 143(10) of the Act. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and the disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the standalone Ind AS financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal financial control relevant to the Company's preparation of the standalone Ind AS financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances. An audit also includes evaluating the appropriateness of the accounting policies used and the reasonableness of the accounting estimates made by the Company's Directors, as well as evaluating the overall presentation of the standalone Ind AS financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our qualified audit opinion on the standalone Ind AS financial statements.

4. Basis for Qualified Opinion

- (a) During the year the company has switched over to new ERP system on account of GST implementation, which has been implemented in stages and only certain modules are operational, accuracy of which are yet to be tested by management. The audited financial statements for the year ended March 31, 2018 has been compiled from primary as well subsidiary or other records maintained by the management pending testing of accuracy of newly introduced ERP system. As a result, Debtors ledger control accounts and accounts as per subsidiary records are under reconciliation. We are unable to ascertain the impact on the financial statements of the company pending such reconciliation. (Refer Note No. 55)
- (b) We have not participated in physical verification inventories of raw material, packing material, finished goods, work in progress goods, stock in trade. We have relied on physical verification certificate issued by internal auditors of the company, a firm of chartered accountants as well as certificate of the valuation of finished goods, stock in transit and work in progress. (Refer Note No.49)
- (c) Amount of ₹. 124.04 lakhs (2016 – 2017: ₹. 124.04 lakhs) has been shown as recoverable relating to the misappropriation done by the employee of the company in the earlier years. However, no provision has been made against the said amount as the management has initiated legal steps for the recovery of the said amount and is confident of recovery. In our opinion the recovery of the amount is doubtful and consequently the profit is over stated by ₹. 124.04 lakhs (2016 – 2017: ₹. 124.04 lakhs) with consequential impact on Shareholders Fund and other non-current assets which are over stated by the said amount. (Refer Note 54).
- (d) Balance of Trade Receivable, loans & advances, Employee Advance, Trade Payable and Security and Trade Deposits from Agents and Stockists, are subject to confirmations, verification and adjustments necessary upon reconciliation thereof. Adjustments required upon such confirmations, if any, are not ascertainable and hence not provided for.
- (e) We have not been provided with reconciliation of purchase, sales, input credits shown in books of account with GST

return filed by the company. Hence, we are unable to comment on effect of the same on the financial statements of the company pending such reconciliation.

The cumulative impact of the above said modification on the standalone financial statement are not ascertainable, except para 4© where the profit is over stated by ₹. 124.04 lakhs.

5. Qualified Opinion

In our opinion and to the best of our information and according to the explanations given to us, except for the effects of the matter specified in para 4 in the Basis for Qualified Opinion paragraph above, the aforesaid standalone Ind AS financial statements, read together with notes to the accounts thereon, give the information required by the Act in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the state of affairs of the Company as at March 31, 2018, its profit including other comprehensive income, its cash flows and changes in equity for the year ended on that date.

6. Emphasis of Matter

For the purpose of segment reporting we have relied upon the segment wise report prepared by the management based on the nature of product, risk and returns, organization structure. The figures have been regrouped and reclassified wherever necessary by the management.

7. Report on Other Legal and Regulatory Requirements

As required by the Companies (Auditors' Report) Order, 2016 ("the Order") issued by the Central Government of India in terms of sub-section (11) of section 143 of the Act, we give in the "**Annexure A**", a statement on the matters specified in paragraphs 3 and 4 of the Order.

8. As required by Section 143 (3) of the Act, we report that:

- (a) We have sought and except for the matters described in the para 4 (a), 4 (d) and 4 (e) of the Basis for Qualified Opinion paragraph, obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.
- (b) In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books.
- (c) The Balance Sheet, the Statement of Profit and Loss including the statement of other comprehensive Income, the Cash Flow Statement and the Statement of changes in Equity dealt with by this Report are in agreement with the books of account.
- (d) In our opinion, the aforesaid standalone Ind AS financial statements comply with the Accounting Standards specified under Section 133 of the Act, read Companies (Indian Accounting Standards) Rules, 2015, as amended.
- (e) The matter described in the Basis for Qualified Opinion paragraph 4 above in our opinion, may have an adverse effect on the functioning of the Company.
- (f) On the basis of the written representations received from the directors as on March 31, 2018 and taken on record by the Board of Directors, none of the directors is disqualified as on March 31, 2018 from being appointed as a director in terms of Section 164 (2) of the Act.
- (g) with respect to the adequacy of the internal financial controls over financial reporting of the Company and the operating effectiveness of such controls, refer to our separate report in "Annexure B"; and
- (h) With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, in our opinion and to the best of our information and according to the explanations given to us:
 - (i) The Company has disclosed the impact of pending litigations on its financial position in its financial statements as referred to in Note 44 to the standalone Ind AS financial statements.
 - (ii) The Company has made provision, as required under the applicable law or accounting standards, for material foreseeable losses, if any, on long-term contracts including derivative contracts.
 - (iii) There has been no delay in transferring amounts, required to be transferred, to the Investor Education and Protection Fund by the Company

ANNEXURE: B REFERRED TO IN PARA 14(g) OF THE INDEPENDENT AUDITOR'S REPORT OF EVEN DATE ON THE STANDALONE FINANCIAL STATEMENT OF GUFIC BIOSCIENCES LIMITED

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013

1. We have audited the internal financial controls over financial reporting of **Gufic Biosciences Limited** (the "Company") as of March 31, 2018 in conjunction with our audit of the standalone financial statements for the year ended on that date.
2. **Management's Responsibility for Internal Financial Controls:** The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ("ICAI"). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.
3. **Auditors' Responsibility:** Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit.

We have conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the ICAI. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects to the extent applicable.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our Qualified audit opinion on the Company's internal financial controls system over financial reporting.

4. **Meaning of Internal Financial Controls over Financial Reporting:** A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that
 - (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company;
 - (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and
 - (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.
5. **Inherent Limitations of Internal Financial Controls over Financial Reporting:** Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper

management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

6. **Qualified opinion:** According to the information and explanations given to us and based on our audit, the following material weaknesses have been identified as at March 31, 2018:

The company did not have an appropriate internal control system in respect of:

- a) for review of Trade Receivables, other recoverable including loans and advances, Trade Payable and Security and Trade Deposits from Agents and Stockists, obtaining their confirmations and reconciliation of their outstanding balances with the books of accounts. This could potentially affect the balance in the trade receivable, other recoverable, trade payable, Security Deposit account and income and expenses account balances.
- b) for reconciliation of purchase, sales, input credits shown in books of account with GST return filed by the company. This could potentially affect the income, expenses and receivable account balances.
- c) segregation of duties to effectively monitor and operate the control of depositing undisputed statutory dues including Provident Fund, Income Tax, TDS, Sales-Tax, Wealth tax, VAT, duty of customs, Service tax, Cess and other material undisputed statutory dues with the appropriate authorities. This could potentially result in levy of interest and other penal provisions of statutes and have a significant impact on functioning of the Company.
- d) There is a material weakness with regard to control over advances given to suppliers for goods and services. The controls with regard to subsequent settlement of advances are ineffective and as a result many parties to whom advances have been given are very old and remain unsettled. Further there is no control system over confirmation and reconciliation of balance with parties. These could potentially result in write off of advances and have an impact on financial statements of the Company.
- e) The company during the year has implemented the new ERP system in stages and only certain modules are operational, accuracy of which are yet to be tested by the management. The system control requires strengthening, so that complete and accurate reports generated can be relied upon.

A 'material weakness' is a deficiency, or a combination of deficiencies, in internal financial control over financial reporting, such that there is a reasonable possibility that a material misstatement of the Company's annual or interim financial statements will not be prevented or detected on a timely basis.

7. **Opinion:** In our opinion, except for the possible effects of the material weaknesses described above on the achievement of the objectives of the control criteria, the Company has maintained, in all material respects, adequate internal financial controls over financial reporting and such internal financial controls over financial reporting were operating effectively as of March 31, 2018, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.
8. We have considered the material weaknesses identified and reported above in determining the nature, timing, and extent of audit tests applied in our audit of the standalone financial statements of the Company for the year ended March 31, 2018 and these material weaknesses do not affect our opinion on the standalone financial statements of the Company, other than qualification reported by us in our Independent Audit Report.

NOTES TO THE STANDALONE FINANCIAL STATEMENTS FOR THE YEAR ENDED MARCH 31, 2018 -Continued.. All amounts are in Rs. lakhs unless otherwise stated

NOTE 1 Corporate Information

The Standalone financial statements comprise financial statements of Gufic Biosciences Limited (the company) for the year ended March 31, 2018. The company is a public company domiciled in India and is incorporated under the provisions of the Companies Act applicable in India. Its shares are listed on two recognised stock exchanges in India. The registered office of the company is located at 37, 1st Floor, Kamala Bhavan II, Swami Nityanand Road, Andheri (East), Mumbai - 400 069 and the corporate office is located at 1st to 4th Floor, S.M. House, II Sahakar Road, Vile Parle (East), Mumbai – 400057.

The Company is principally engaged in manufacturing and marketing of active pharmaceutical ingredients, generic pharmaceuticals and related services. These financial statements were authorized for issue in accordance with the resolution of the Directors on May 29, 2018 and are subject to the approval of the shareholders at the Annual General Meeting.

NOTE 2 Significant Accounting Policies

2.1 Statement of Compliance

The Standalone financial statements of the company have been prepared in accordance with the accounting principles generally accepted in India including Indian Accounting Standards (Ind AS) notified under the Companies (Indian Accounting Standards) Rules, 2015, as amended by the Companies (Indian Accounting Standard) (Amendment) Rules, 2017.

These Standalone Financial Statements are Company's first Ind AS Financial Statements and the transition from Previous GAAP to Ind AS has been accounted for in accordance with Ind AS 101 "First Time Adoption of Indian Accounting Standards", with April 1, 2016 being the transition date.

In accordance with Ind As 101 "First time adoption of Indian Accounting Standard", the Company has presented a reconciliation in note 56, from the presentation of financial statements under accounting standards notified under the Companies (Accounting Standards) Rules, 2006 ("Previous GAAP") to Ind AS of total equity as at April 1, 2016 and March 31, 2017, total comprehensive income and cash flow for the year ended March 31, 2017.

2.2 Basis of preparation and presentation

2.2.1 Historical cost convention

The Standalone financial statements have been prepared on accrual basis and under the historical cost basis, except for certain financial instruments and defined benefit plans that are measured at fair values at the end of each reporting period.

Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

The Company's Board of Directors approves the financial statements for issue on May 29, 2018. The aforesaid financial statement have been prepared in Indian Rupee (INR) which is the functional currency for the Company.

All amounts disclosed in the financial statements and notes have been rounded off to the nearest Lakhs.

2.2.2 Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Company takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date.

In addition, for financial reporting purposes, fair value measurements are categorised into Level 1, 2, or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;
- Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and
- Level 3 inputs are unobservable inputs for the asset or liability.

2.2.3 Current versus non-current classification

All assets and liabilities have been classified as current or non-current as per the company's normal operating cycle (twelve months) and other criteria set out in the Schedule III to the Act and Ind AS I Presentation of financial statements.

Based on the nature of products and the time between the acquisition of assets for processing and their realisation, the Company has ascertained its operating cycle as 12 months for the purpose of current / non current classification of assets and liabilities.

Assets:

An asset is classified as current when it satisfies any of the following criteria:

- it is expected to be realised in, or is intended for sale or consumption in, the Company's normal operating cycle;
- it is held primarily for the purpose of being traded;
- it is expected to be realised within twelve months after the reporting date; or
- it is cash or cash equivalent unless it is restricted from being exchanged or used to settle a liability for at least 12 months after the reporting date.

Liabilities:

A liability is classified as current when it satisfies any of the following criteria:

- it is expected to be settled in the Company's normal operating cycle;
- it is held primarily for the purpose of being traded;
- it is due to be settled within twelve months after the reporting date; or
- the Company does not have an unconditional right to defer settlement of the liability for at least twelve months after the reporting date. Terms of a liability that could, at the option of the counterparty, result in its settlement by the issue of equity instruments do not affect its classification.

All other assets/ liabilities are classified as non-current.

2.3 Revenue recognition

Revenue is measured on at the fair value of the consideration received or receivable and recognised as follows:

(i) Sale of Goods

Revenue from the sale of goods is recognised when the goods are delivered and the titles have passed, at which time all the following conditions are satisfied:

- the Company has transferred to the buyer the significant risks and rewards of ownership of the goods;
- the Company retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- the amount of revenue can be measured reliably;
- it is probable that the economic benefits associated with the transaction will flow to the Company, and
- the costs incurred or to be incurred in respect of the transaction can be measured reliably.

Sale of products, has been recognised, net of discounts, sales incentives, rebates granted, returns, sales taxes and duties. Sale of products is presented gross of manufacturing taxes like excise duty wherever applicable.

Provision is made for the non-sellable returns of goods from the customers estimated on the basis of historical data of such returns. Such provision for non-sellable sales returns is reduced from sales for the year.

Export sales are accounted for on basis of the dates of bill of lading and Export benefits under duty exemption scheme is being accounted in the year of exports

(ii) Sales of Services

Revenues from services are recognized when such services are rendered.

(iii) Interest and dividend income:

Interest income from a financial asset is recognised when it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net

carrying amount on initial recognition.

Dividend income from investments is recognised when the shareholder's right to receive payment has been established (provided that it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably).

2.4 Foreign currencies

The functional currency of the Company is determined on the basis of the primary economic environment in which it operates. The functional currency of the Company is Indian National Rupee (INR).

The transactions in currencies other than the Company's functional currency (foreign currencies) are recognised at the rates of exchange prevailing at the dates of the transactions. At the end of each reporting period, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. Differences arising on settlement or translation of monetary items are recognised in profit or loss.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined. The gain or loss arising on translation of non-monetary items measured at fair value is treated in line with the recognition of the gain or loss on the change in fair value of the item (i.e., translation differences on items whose fair value gain or loss is recognised in OCI or profit or loss are also recognised in OCI or profit or loss, respectively).

2.5 Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale.

Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds. Borrowing cost also includes exchange differences to the extent regarded as an adjustment to the borrowing costs.

Interest income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation.

All other borrowing costs are recognised in profit or loss in the period in which they are incurred.

2.6 Employee benefits

2.6.1 Short Term Employee Benefits

All employee benefits payable wholly within twelve months of rendering the service are classified as short term employee benefits and they are recognized in the period in which the employee renders the related service. The Company recognizes the undiscounted amount of short term employee benefits expected to be paid in exchange for services rendered as a liability (accrued expense) after deducting any amount already paid.

2.6.2 Post-Employment Benefits:

I. Defined Contribution plans:

Employee benefits in the form of contribution to Provident Fund, Employees State Insurance Corporation and Labour Welfare Fund are considered as defined contribution plan and the same is charged to the statement of profit and loss for the year when the contributions to the respective funds are due.

Recognition and measurement of defined contribution plans:

The Company recognizes contribution payable to a defined contribution plan as an expense in the Statement of Profit and Loss when the employees render services to the Company during the reporting period. If the contributions payable for services received from employees before the reporting date exceeds the contributions already paid, the deficit payable is recognized as a liability after deducting the contribution already paid. If the contribution already paid exceeds the contribution due for services received before the reporting date, the excess is recognized as an asset to the extent that the prepayment will lead to, for example, a reduction in future payments or a cash refund.

II. Defined Benefit plans:

Gratuity scheme:

The Company operates a defined benefit gratuity plan for employees. The Company contributes to a separate entity (a fund), towards meeting the Gratuity obligation.

Recognition and measurement of Defined Benefit plans:

The cost of providing defined benefits is determined using the Projected Unit Credit method with actuarial valuations being carried out at each reporting date. The defined benefit obligations recognized in the Balance Sheet represent the present value of the defined benefit obligations as reduced by the fair value of plan assets, if applicable. Any defined benefit asset (negative defined benefit obligations resulting from this calculation) is recognized representing the present value of available refunds and reductions in future contributions to the plan.

All expenses represented by current service cost, past service cost, if any, and net interest on the defined benefit liability / (asset) are recognized in the Statement of Profit and Loss. Remeasurements of the net defined benefit liability / (asset) comprising actuarial gains and losses and the return on the plan assets (excluding amounts included in net interest on the net defined benefit liability/asset), are recognized in Other Comprehensive Income. Such re measurements are not reclassified to the Statement of Profit and Loss in the subsequent periods.

The Company presents the above liability/(asset) as current and non-current in the Balance Sheet as per actuarial valuation by the independent actuary; however, the entire liability towards gratuity is considered as current as the Company will contribute this amount to the gratuity fund within the next twelve months.

III. Other Long Term Employee Benefits:

The company provides for the encashment of leave or leave with pay subject to certain rules. The employees are entitled to accumulate leave subject to certain limits, for future encashment. Compensated absences are provided for on the basis of an actuarial valuation, using the projected unit credit method, as at the date of the balance sheet. Actuarial gains / losses, if any, are immediately recognised in the statement of profit and loss.

2.7 Income Tax

The income tax expense or credit for the period is the tax payable on the current period's taxable income based on the applicable income tax rate adjusted by changes in deferred tax assets and liabilities attributable to temporary differences and to unused tax losses.

The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the end of the reporting period.. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

Deferred income tax is provided in full, using the liability method on temporary differences arising between the tax bases of assets and liabilities and their carrying amount in the financial statement. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the end of the reporting period and are excepted to apply when the related deferred income tax assets is realized or the deferred income tax liability is settled.

Deferred tax assets are recognised for all deductible temporary differences and unused tax losses only if it is probable that future taxable amounts will be available to utilise those temporary differences and losses.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets and liabilities and when the deferred tax balances relate to the same taxation authority. Current tax assets and tax liabilities are off set where the company has a legally enforceable right to offset and intends either to settle on a net basis, or to realize the asset and settle the liability simultaneously.

Current and deferred tax is recognised in the Statement of profit and loss, except to the extent that it relates to items recognised in other comprehensive income or directly in equity. In this case, the tax is also recognised in other comprehensive income or directly in equity, respectively.

Minimum Alternative Tax ("MAT") credit forming part of deferred tax asset is recognised as an asset only when and to the extent there is reasonable certainty that the company will pay normal income tax during the specified period. Such asset is reviewed at each balance sheet date and the carrying amount of the MAT Credit asset is written down to the extent there is no longer a reasonable certainty to the effect that the company will pay normal income tax during the specified period.

2.8 Property, plant and equipment

These are carried at cost of acquisition net of any discounts and rebates and depreciated in accordance with the policy stated below:

These are amortised over the useful economic life and assessed for impairment whenever there is an indication that the asset may be impaired. The amortisation period and the amortisation method for an asset life are reviewed at least at the end of each reporting period. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are considered to modify the amortisation period or

method, as appropriate, and are treated as changes in accounting estimates. The amortisation expense on assets with finite lives is recognised in the statement of profit and loss.

When significant parts of plant and equipment are required to be replaced at intervals, the company depreciates them separately based on their specific useful lives. Likewise, when a major inspection is performed, its cost is recognised in the carrying amount of the plant and equipment as a replacement if the recognition criteria are satisfied. All other repair and maintenance costs are recognised in profit or loss as incurred.

Deemed cost on transition to Ind AS

For transition to Ind AS, the Company has elected to continue with the carrying value of all of its property, plant and equipment recognised as of April 1, 2016 (transition date) measured as per the previous GAAP and use that carrying value as its deemed cost as of the transition date.

Depreciation on assets is provided on Straight Line Method, pro-rata to the period of use, based on the useful life of the assets as prescribed under the Schedule II of the Companies Act, 2013.

Capital Expenditure incurred on the assets not owned by the company are amortised over a period of five years.

The management believes that these estimated useful lives are realistic and reflect fair approximation of the period over which the assets are likely to be used.

An item of property, plant and equipment and any significant part initially recognised is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the income statement when the asset is derecognised.

The residual values, useful lives and methods of depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively, if appropriate.

2.9

Intangible assets

Intangible assets with finite useful lives that are acquired separately are carried at cost less accumulated amortisation and accumulated impairment losses. Amortisation is recognised on a straight-line basis over their estimated useful lives. The estimated useful life and amortisation method are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis. Intangible assets with indefinite useful lives that are acquired separately are carried at cost less accumulated impairment losses.

Estimated useful lives of the intangible assets are as follows; Brands and Technical Know-how are amortised on a straight line basis over a period of ten years. Software cost is amortised on Straight line basis over a period of three years.

An intangible asset is derecognised on disposal, or when no future economic benefits are expected from use or disposal, Gains or losses arising from derecognition of an intangible asset, measured as the difference between the net disposal proceeds and the carrying amount of the asset, are recognised in profit or loss when the asset is derecognised.

Deemed cost on transition to Ind AS

For transition to Ind AS, the Company has elected to continue with the carrying value of all of its intangible assets recognised as of April 1, 2016 (transition date) measured as per the previous GAAP and use that carrying value as its deemed cost as of the transition date.

2.10

Impairment of tangible and intangible assets other than goodwill

At the end of each reporting period, the Company reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). When it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the cash-generating unit to which the asset belongs. When a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash generating units, or otherwise they are allocated to the smallest company of cash-generating units for which a reasonable and consistent allocation basis can be identified.

Recoverable amount is the higher of fair value less costs of disposal and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the

carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognised immediately in profit or loss.

When an impairment loss subsequently reverses, the carrying amount of the asset (or a cash-generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (or cash-generating unit) in prior years. A reversal of an impairment loss is recognised immediately in profit or loss.

2.11 Inventories

Inventories are valued at the lower of cost and net realisable value.

Costs incurred in bringing each product to its present location and condition are accounted for as follows:

- (i) Raw materials and Packing Material : purchase cost on a first in, first out basis
- (ii) Finished goods and work in progress: cost of direct materials and labour and a proportion of manufacturing overheads based on the normal operating capacity, but excluding borrowing costs.
- (iii) Traded goods are valued on First in First Out basis.
- (iv) Consumable stores are charged to the profit and loss account in the year of its purchases.

Net realisable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and the estimated costs necessary to make the sale.

2.12 Leases

The determination of whether an arrangement is (or contains) a lease is based on the substance of the arrangement at the inception of the lease. The arrangement is, or contains, a lease if fulfilment of the arrangement is dependent on the use of a specific asset or assets and the arrangement conveys a right to use the asset or assets, even if that right is not explicitly specified in an arrangement.

For arrangements entered into prior to April 1, 2017, the date of inception is deemed to be April 1, 2016 in accordance with Ind-AS 101 First-time Adoption of Indian Accounting Standard.

A lease is classified at the inception date as a finance lease or an operating lease. A lease that transfers substantially all the risks and rewards incidental to ownership to the Company is classified as a finance lease.

Finance leases are capitalised at the commencement of the lease at the inception date fair value of the leased property or, if lower, at the present value of the minimum lease payments. Lease payments are apportioned between finance charges and reduction of the lease liability so as to achieve a constant rate of interest on the remaining balance of the liability. Finance charges are recognised in finance costs in the statement of profit and loss.

A leased asset is depreciated over the useful life of the asset. However, if there is no reasonable certainty that the Group will obtain ownership by the end of the lease term, the asset is depreciated over the shorter of the estimated useful life of the asset and the lease term.

Operating lease payments are recognised as an expense in the statement of profit and loss on a straight-line basis over the lease term unless another systematic basis is more representative of the time pattern in which the benefit is derived from the leased asset; or payments to the lessor are structured to increase in line with expected general inflation to compensate for the lessor's expected inflationary cost increases.

The Company as lessor:

Rental income from operating leases is generally recognised on a straight-line basis over the term of the relevant lease unless the receipts are structured to increase in line with expected general inflation to compensate for the expected inflationary cost increase. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised on a straight-line basis over the lease term.

The Company as lessee:

Assets held under finance leases are initially recognised as assets of the Company at their fair value at the inception of the lease or, if lower, at the present value of the minimum lease payments. The corresponding liability to the lessor is included in the balance sheet as a finance lease obligation.

Lease payments are apportioned between finance expenses and reduction of the lease obligation so as to achieve a constant rate of interest on the remaining balance of the liability. Finance expenses are recognised immediately in profit or loss, unless they are directly attributable to qualifying assets, in which case they are capitalised in accordance with the Company's general policy on borrowing costs. Contingent rentals are recognised as expenses in the periods in which they are incurred.

Rental expense from operating leases is generally recognised on a straight-line basis over the term of the relevant

lease. Where the rentals are structured solely to increase in line with expected general inflation to compensate for the lessor's expected inflationary cost increases, such increases are recognised in the year in which such benefits accrue. Contingent rentals arising under operating leases are recognised as an expense in the period in which they are incurred.

2.13 Provisions

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that the Company will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (when the effect of the time value of money is material).

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, a receivable is recognised as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

2.14 Cash and Cash Equivalents

For the purpose of presentation in the statement of cash flows, cash and cash equivalents includes cash on hand, overdrawn bank balances, bank overdraft, deposits held at call with financial institutions, other short-term highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

2.15 Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition.

2.16 Financial Assets

Initial recognition and measurement:

All financial assets are recognised initially at fair value plus, in the case of financial assets not recorded at fair value through profit or loss, transaction costs that are attributable to the acquisition of the financial asset. Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognised on the trade date, i.e., the date that the company commits to purchase or sell the asset.

Subsequent measurement:

For purposes of subsequent measurement, financial assets are classified in four categories:

- Debt instruments at amortised cost
- Debt instruments at fair value through other comprehensive income (FVTOCI)
- Debt instruments, derivatives and equity instruments at fair value through profit or loss (FVTPL)
- Equity instruments measured at fair value through other comprehensive income FVTOCI

Effective interest method:

The effective interest method is a method of calculating the amortised cost of a debt instrument and of allocating interest income over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the debt instrument, or, where appropriate, a shorter period, to the net carrying amount on initial recognition.

Income is recognised on an effective interest basis for debt instruments other than those financial assets classified as at FVTPL. Interest income is recognised in profit or loss and is included in the "Other income" line item.

Debt instruments at amortised cost

A 'debt instrument' is measured at the amortised cost if both the following conditions are met:

- (a) The asset is held within a business model whose objective is to hold assets for collecting contractual cash flows, &
- (b) Contractual terms of the asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

This category is the most relevant to the company. After initial measurement, such financial assets are subsequently measured at amortised cost using the effective interest rate (EIR) method. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included in finance income in the profit or loss. The losses arising from impairment are recognised in the profit or loss. This category generally applies to trade and other receivables. For more information on receivables, refer to Note 15.

Debt instrument at FVTOCI

A 'debt instrument' is classified as at the FVTOCI if both of the following criteria are met:

- (a) The objective of the business model is achieved both by collecting contractual cash flows and selling the financial assets, and
- (b) The asset's contractual cash flows represent SPPI.

Debt instruments included within the FVTOCI category are measured initially as well as at each reporting date at fair value. Fair value movements are recognized in the other comprehensive income (OCI). However, the company recognizes interest income, impairment losses & reversals and foreign exchange gain or loss in the P&L. On derecognition of the asset, cumulative gain or loss previously recognised in OCI is reclassified from the equity to P&L. Interest earned whilst holding FVTOCI debt instrument is reported as interest income using the EIR method.

Debt instrument at FVTPL

FVTPL is a residual category for debt instruments. Any debt instrument, which does not meet the criteria for categorization as at amortized cost or as FVTOCI, is classified as at FVTPL.

In addition, the company may elect to classify a debt instrument, which otherwise meets amortized cost or FVTOCI criteria, as at FVTPL. However, such election is allowed only if doing so reduces or eliminates a measurement or recognition inconsistency (referred to as 'accounting mismatch').

Debt instruments included within the FVTPL category are measured at fair value with all changes recognized in the P&L.

Equity investments

All equity investments in scope of Ind-AS 109 are measured at fair value. Equity instruments which are held for trading are classified as at FVTPL. For all other equity instruments, the company decides to classify the same either as at FVTOCI or FVTPL. The company makes such election on an instrument-by-instrument basis. The classification is made on initial recognition and is irrevocable.

If the company decides to classify an equity instrument as at FVTOCI, then all fair value changes on the instrument, excluding dividends, are recognized in the OCI. There is no recycling of the amounts from OCI to P&L, even on sale of investment. However, the company may transfer the cumulative gain or loss within equity.

Equity instruments included within the FVTPL category are measured at fair value with all changes recognized in the P&L.

Derecognition

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognised (i.e. removed from the company standalone balance sheet) when:

- The rights to receive cash flows from the asset have expired, or
 - The company has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; & either
- (a) the company has transferred substantially all the risks and rewards of the asset, or (b) the company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset

When the company has transferred its rights to receive cash flows from an asset or has entered into a pass through arrangement, it evaluates if and to what extent it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the company continues to recognise the transferred asset to the extent of the company's continuing involvement. In that case, the company also recognises an associated liability. The transferred asset and the

associated liability are measured on a basis that reflects the rights and obligations that the company has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the company could be required to repay.

Impairment of financial assets

In accordance with Ind-AS 109, the company applies expected credit loss (ECL) model for measurement and recognition of impairment loss on the following financial assets and credit risk exposure:

- (a) Financial assets that are debt instruments, and are measured at amortised cost e.g., loans, debt securities, deposits, trade receivables and bank balance
- (b) Financial assets that are debt instruments and are measured as at FVTOCI
- (c) Lease receivables under Ind-AS 17
- (d) Financial guarantee contracts which are not measured as at FVTPL

The company follows 'simplified approach' for recognition of impairment loss allowance on:

- Trade receivables and
- All lease receivables resulting from transactions within the scope of Ind-AS 17

The application of simplified approach does not require the company to track changes in credit risk. Rather, it recognises impairment loss allowance based on lifetime ECLs at each reporting date, right from its initial recognition.

For recognition of impairment loss on other financial assets and risk exposure, the company determines that whether there has been a significant increase in the credit risk since initial recognition. If credit risk has not increased significantly, 12-month ECL is used to provide for impairment loss. However, if credit risk has increased significantly, lifetime ECL is used. If, in a subsequent period, credit quality of the instrument improves such that there is no longer a significant increase in credit risk since initial recognition, then the entity reverts to recognising impairment loss allowance based on 12-month ECL.

Lifetime ECL are the expected credit losses resulting from all possible default events over the expected life of a financial instrument. The 12-month ECL is a portion of the lifetime ECL which results from default events on a financial instrument that are possible within 12 months after the reporting date.

ECL is the difference between all contractual cash flows that are due to the company in accordance with the contract and all the cash flows that the entity expects to receive (i.e., all cash shortfalls), discounted at the original EIR. When estimating the cash flows, an entity is required to consider:

- o All contractual terms of the financial instrument (including prepayment, extension, call and similar options) over the expected life of the financial instrument. However, in rare cases when the expected life of the financial instrument cannot be estimated reliably, then the entity is required to use the remaining contractual term of the financial instrument
- o Cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms

ECL impairment loss allowance (or reversal) recognized during the period is recognized as income/ expense in the statement of profit and loss (P&L). This amount is reflected in a separate line in the P&L as an impairment gain or loss. The balance sheet presentation for various financial instruments is described below:

- Financial assets measured as at amortised cost, contract assets and lease receivables: ECL is presented as an allowance, i.e. as an integral part of the measurement of those assets in the balance sheet. The allowance reduces the net carrying amount. Until the asset meets write-off criteria, the company does not reduce impairment allowance from the gross carrying amount.
- Loan commitments and financial guarantee contracts: ECL is presented as a provision in the balance sheet, i.e. as a liability.
- Debt instruments measured at FVTOCI: Since financial assets are already reflected at fair value, impairment allowance is not further reduced from its value. Rather, ECL amount is presented as 'accumulated impairment amount' in the OCI.

For assessing increase in credit risk and impairment loss, the company combines financial instruments on the

basis of shared credit risk characteristics with the objective of facilitating an analysis that is designed to enable significant increases in credit risk to be identified on a timely basis.

The company does not have any purchased or originated credit-impaired (POCI) financial assets, i.e., financial assets which are credit impaired on purchase/ origination.

2.17 Financial liabilities and equity instruments

Initial recognition and measurement:

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings, payables, or as derivatives designated as hedging instruments in an effective hedge, as appropriate.

All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

The company's financial liabilities include trade and other payables, loans and borrowings including bank overdrafts, financial guarantee contracts and derivative financial instruments.

Subsequent measurement:

The measurement of financial liabilities depends on their classification, as described below:

Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated upon initial recognition as at fair value through profit or loss. Financial liabilities are classified as held for trading if they are incurred for the purpose of repurchasing in the near term.

Gains or losses on liabilities held for trading are recognised in the profit or loss.

Financial liabilities designated upon initial recognition at fair value through profit or loss are designated at the initial date of recognition, and only if the criteria in Ind-AS 109 are satisfied. For liabilities designated as FVTPL, fair value gains/ losses attributable to changes in own credit risk are recognized in OCI. These gains/ loss are not subsequently transferred to P&L. However, the company may transfer the cumulative gain or loss within equity. All other changes in fair value of such liability are recognised in the statement of profit or loss.

Loans and borrowings

After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost using the EIR method. Gains and losses are recognised in profit or loss when the liabilities are derecognised as well as through the EIR amortisation process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the statement of profit and loss.

Financial guarantee contracts

Financial guarantee contracts issued by the company are those contracts that require a payment to be made to reimburse the holder for a loss it incurs because the specified debtor fails to make a payment when due in accordance with the terms of a debt instrument. Financial guarantee contracts are recognised initially as a liability at fair value, adjusted for transaction costs that are directly attributable to the issuance of the guarantee. Subsequently, the liability is measured at the higher of the amount of loss allowance determined as per impairment requirements of Ind-AS 109 and the amount recognised less cumulative amortisation.

Derecognition

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the statement of profit or loss.

Reclassification of financial assets

The company determines classification of financial assets and liabilities on initial recognition. After initial recognition, no reclassification is made for financial assets which are equity instruments and financial liabilities. For financial assets which are debt instruments, a reclassification is made only if there is a change in the business

model for managing those assets. Changes to the business model are expected to be infrequent. The company's senior management determines change in the business model as a result of external or internal changes which are significant to the company's operations. Such changes are evident to external parties. A change in the business model occurs when the company either begins or ceases to perform an activity that is significant to its operations. If the company reclassifies financial assets, it applies the reclassification prospectively from the reclassification date which is the first day of the immediately next reporting period following the change in business model. The company does not restate any previously recognised gains, losses (including impairment gains or losses) or interest.

Original Classification	Revised classification	Accounting treatment
Amortised cost	FVTPL	Fair value is measured at reclassification date. Difference between previous amortized cost and fair value is recognised in P&L.
FVTPL	Amortised Cost	Fair value at reclassification date becomes its new gross carrying amount. EIR is calculated based on the new gross carrying amount.
Amortised cost	FVTOCI	Fair value is measured at reclassification date. Difference between previous amortised cost and fair value is recognised in OCI. No change in EIR due to reclassification.
FVOCI	Amortised Cost	Fair value at reclassification date becomes its new amortised cost carrying amount. However, cumulative gain or loss in OCI is adjusted against fair value. Consequently, the asset is measured as if it had always been measured at amortised cost.

Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

2.18 Segment Reporting:

Operating segments are reported in a manner consistent with the internal reporting provided to the Board of Directors, which are considered as the Chief Operating Decision Maker (CODM).

2.19 Earnings Per Share

Basic earnings per share is computed by dividing the profit / (loss) after tax by the weighted average number of equity shares outstanding during the year. The weighted average number of equity shares outstanding during the year is adjusted for treasury shares, bonus issue, bonus element in a rights issue to existing shareholders, share split and reverse share split (consolidation of shares).

Diluted earnings per share is computed by dividing the profit / (loss) after tax as adjusted for dividend, interest and other charges to expense or income (net of any attributable taxes) relating to the dilutive potential equity shares, by the weighted average number of equity shares considered for deriving basic earnings per share and the weighted average number of equity shares which could have been issued on the conversion of all dilutive potential equity shares including the treasury shares held by the Company to satisfy the exercise of the share options by the employees.

NOTE 3 Application of new Revised Ind AS

3.1 Ind AS 115- Revenue from Contract with Customers:

On March 28, 2018, Ministry of Corporate Affairs ("MCA") has notified the Ind AS 115, Revenue from Contract with Customers. The core principle of the new standard is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. Further, the new standard requires enhanced disclosures about the nature, amount, timing and uncertainty of revenue and cash flows arising from the entity's contracts with customers.

The standard permits two possible methods of transition:

- Retrospective approach - Under this approach the standard will be applied retrospectively to each prior reporting period presented in accordance with Ind AS 8- Accounting Policies, Changes in Accounting

Estimates and Errors.

- Retrospectively with cumulative effect of initially applying, the standard recognized at the date of initial application (Cumulative catch - up approach).

The effective date for adoption of Ind AS 115 is financial periods beginning on or after April 1, 2018. The Company will adopt the standard on April 1, 2018. The Company is under the process of evaluating the impact of Ind AS 115.

3.2 **Appendix B to Ind AS 21, Foreign currency transactions and advance consideration:**

On March 28, 2018, Ministry of Corporate Affairs ("MCA") has notified the Companies (Indian Accounting Standards) Amendment Rules, 2018 containing Appendix B to Ind AS 21, Foreign currency transactions and advance consideration which clarifies the date of the transaction for the purpose of determining the exchange rate to use on initial recognition of the related asset, expense or income, when an entity has received or paid advance consideration in a foreign currency. The amendment will come into force from April 1, 2018. The Company has evaluated the effect of this on the financial statements and the impact is not material.

NOTE 4 **Critical estimates and judgements**

In the course of applying the policies outlined in all notes under section 2 above, the Company is required to make judgements, estimates and assumptions about the carrying amount of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future period, if the revision affects current and future period.

4.1 **Key sources of estimation uncertainty**

i. Useful lives of property, plant and equipment and intangible assets

Management reviews the useful lives of property, plant and equipment and intangible assets at least once a year. Such lives are dependent upon an assessment of both the technical lives of the assets and also their likely economic lives based on various internal and external factors including relative efficiency and operating costs. Accordingly depreciable lives are reviewed annually using the best information available to the management.

ii. Provisions and liabilities

Provisions and liabilities are recognized in the period when it becomes probable that there will be a future outflow of funds resulting from past operations or events that can reasonably be estimated. The timing of recognition requires application of judgement to existing facts and circumstances, which may be subject to change. The amounts are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability.

iii. Contingencies

In the normal course of business, contingent liabilities may arise from litigation and other claims against the Company. Potential liabilities that are possible but not probable of crystallising or are very difficult to quantify reliably are treated as contingent liabilities. Such liabilities are disclosed in the notes but are not recognized.

iv. Fair value measurements

When the fair values of financial assets or financial liabilities recorded or disclosed in the financial statements cannot be measured based on quoted prices in active markets, their fair value is measured using valuation techniques including the DCF model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgment is required in establishing fair values. Judgements include consideration of inputs such as liquidity risk, credit risk and volatility.

v. Income Taxes

The Company's tax jurisdiction is India. Significant judgements are involved in estimating budgeted profits for the purpose of paying advance tax, determining the provision for income taxes, including amount expected to be paid/recovered for uncertain tax positions. A tax assessment can involve complex issues, which can only be resolved over extended time periods. The recognition of taxes that are subject to certain legal or economic limits or uncertainties is assessed individually by the management based on the specific facts and circumstances

vi. Defined Benefit Obligations

The costs of providing pensions and other post-employment benefits are charged to the Statement of Profit and Loss in accordance with Ind AS 19 'Employee benefits' over the period during which benefit is derived from the employees' services. The costs are assessed on the basis of assumptions selected by the management. These assumptions include salary escalation rate, discount rates, expected rate of return on assets and

mortality rates. The same is disclosed in Note 40, 'Employee benefits'.

vii. Allowance for uncollected accounts receivable and advances

Trade receivables do not carry any interest and are stated at their normal value as reduced by appropriate allowances for estimated irrecoverable amounts. Individual trade receivables are written off when management seems them not collectible. Impairment is made on the expected credit losses, which are the present value of the cash shortfall over the expected life of the financial assets.

The impairment provisions for financial assets are based on assumption about risk of default and expected loss rates. Judgement in making these assumption and selecting the inputs to the impairment calculation are based on past history, existing market condition as well as forward looking estimates at the end of each reporting period.

viii. Impairment reviews

An impairment exists when the carrying value of an asset or cash generating unit ('CGU') exceeds its recoverable amount. Recoverable amount is the higher of its fair value less costs to sell and its value in use. The value in use calculation is based on a discounted cash flow model. In calculating the value in use, certain assumptions are required to be made in respect of highly uncertain matters, including

management's expectations of growth in EBITDA, long term growth rates; and the selection of discount rates to reflect the risks involved.

NOTE 5 First-time adoption – mandatory exceptions, optional exemptions

The Company has prepared the opening balance sheet as per Ind AS as of April 1, 2016 (the transition date) by,

- recognising all assets and liabilities whose recognition is required by Ind AS,
- not recognising items of assets or liabilities which are not permitted by Ind AS,
- by reclassifying items from previous GAAP to Ind AS as required under Ind AS, and
- applying Ind AS in measurement of recognised assets and liabilities.

However, this principle is subject to the certain exception and certain optional exemptions availed by the Company as detailed below. Since, the financial statements are the first financial statements, the first time adoption –mandatory exceptions and optional exemptions have been explained in detail.

5.1 Derecognition of financial assets and financial liabilities:

The Company has applied the derecognition requirements of financial assets and financial liabilities prospectively for transactions occurring on or after April 1, 2016 (the transition date).

5.2 Designation of previously recognised financial instruments

The Company has designated financial liabilities and financial assets at fair value through profit or loss on the basis of the facts and circumstances that exist at the date of transition to Ind AS.

5.3 Impairment of financial assets

The Company has applied the impairment requirements of Ind AS 109 retrospectively; however, as permitted by Ind AS 101, it has used reasonable and supportable information that is available without undue cost or effort to determine the credit risk at the date that financial instruments were initially recognised in order to compare it with the credit risk at the transition date. Further, the Company has not undertaken an exhaustive search for information when determining, at the date of transition to Ind ASs, whether there have been significant increases in credit risk since initial recognition, as permitted by Ind AS 101.

5.4 Deemed cost for property, plant and equipment, investment property and intangible assets

The Company has elected to continue with the carrying value of all of its property, plant and equipment, investment property and intangible assets recognised as of April 1, 2016 (transition date) measured as per the previous GAAP and use that carrying value as its deemed cost as of the transition date.

5.5 Determining whether an arrangement contains a lease

The Company has applied Appendix C of Ind AS 17 Determining whether an Arrangement contains a Lease to determine whether an arrangement existing at the transition date contains a lease on the basis of facts and circumstances existing at that date.

5.6 Estimates

An entity's estimates in accordance with Ind ASs at the date of transition to Ind Ass shall be consistent with estimates made for the same date in accordance with previous GAAP (after adjustments to reflect any difference in accounting policies), unless there is objective evidence that those estimates were in error.

15.1 Trade receivables

The Company considers the probability of default upon initial recognition of assets and whether there has been a significant increase in credit risks on an ongoing basis throughout each reporting period. The average credit period allowed to the customers is in the range of 30-90 days.

The company has used a practical expedient by computing the expected credit loss allowance for trade receivables based on a provision matrix. The provision matrix takes into account historical credit loss experience and adjusted for forward-looking information. The expected credit loss allowance is based on the ageing of the days the receivables are due and the rates as given in the provision matrix. The provision matrix at the end of the reporting period as follows.

NOTE 40. Employee benefit plans

40.1 Defined contribution plans

The Company operates defined contribution retirement benefit plans for all qualifying employees of its Company. The assets of the plans are held of the company in funds under the control of trustees. Where employees leave the plans prior to full vesting of the contributions, the contributions payable by the company are reduced by the amount of forfeited contributions.

The company has recognised the following amounts in the profit and loss accounts.

	For the year ended 31.03.2018 ₹ in Lakhs	For the year ended 31.03.2017 ₹ in Lakhs	As at April 1,2016 ₹ in Lakhs
Employer's contribution to provident fund & ESIC Fund	117.75	101.73	97.9

40.2 Defined benefit plans

The Company sponsors funded defined benefit plans for qualifying employees. The defined benefit plans are administered by a separate Fund that is legally separated from the entity. The board of the Fund is composed of an equal number of representatives from both employers and (former) employees. The board of the Fund is required by law and by its articles of association to act in the interest of the Fund and of all relevant stakeholders in the scheme, i.e. active employees, inactive employees, retirees, employers. The board of the Fund is responsible for the investment policy with regard to the assets of the Fund.

These plans typically expose the Company to actuarial risks such as: investment risk, interest rate risk, longevity risk and salary risk

GUFIC BIOSCIENCES LIMITED

Investment risk	The present value of the defined benefit plan liability (denominated in Indian Rupee) is calculated using a discount rate which is determined by reference to market yields at the end of the reporting period on government bonds. For other defined benefit plans, the discount rate is determined by reference to market yields at the end of the reporting period on high quality corporate bonds when there is a deep market for such bonds; if the return on plan asset is below this rate, it will create a plan deficit. Currently the plan has a relatively balanced investment in Life Insurance Corporation of India .
Interest risk	A decrease in the bond interest rate will increase the plan liability; however, this will be partially offset by an increase in the return on the plan's debt investments.
Longevity risk	The present value of the defined benefit plan liability is calculated by reference to the best estimate of the mortality of plan participants both during and after their employment. An increase in the life expectancy of the plan participants will increase the plan's liability.
Salary risk	The present value of the defined benefit plan liability is calculated by reference to the future salaries of plan participants. As such, an increase in the salary of the plan participants will increase the plan's liability.

The risk relating to benefits to be paid to the dependents of plan members (widow and orphan benefits) is re-insured by an external insurance company. No other post-retirement benefits are provided to these employees.

The most recent actuarial valuation of the plan assets and the present value of the defined benefit obligation were carried out at March 31, 2018. 42.3 Financial risk management objectives

The company has a board approved policy to manage the various risks that arise from its business activities.

The objective of the risk management policy document is to ensure that the company has proper and continuous risk identification and management process. This process will generally involve the following steps:

- Identifying, ranking risks inherent in the Organisation's strategy (including its overall goals and appetite for risk);
- Selecting the appropriate risk management approaches and transferring or avoiding those risks that the business is not willing or competent to manage;
- Implementing controls to manage the remaining risks;
- Monitoring the effectiveness of risk management approaches and controls;
- Learning from experiences and making improvements.

GUFIC BIOSCIENCES LIMITED

The various Risks to which the company is exposed and the steps taken to mitigate or minimise the same are given below:

42.4 Market risk

The Companies activities primarily expose it to the interest rates risk as discussed below:

42.5 Interest rate risk management

The company is exposed to interest rate risk because it borrows funds from banks and institutions at both fixed and floating interest rates. The risk is managed by the company by maintaining an appropriate mix between fixed and floating rate borrowings. The companies exposures to interest rates on financial assets and financial liabilities are detailed in the liquidity risk management section of this note.

42.5.1 Interest rate sensitivity analysis

The sensitivity analyses below have been determined based on the exposure to interest rates at the end of the reporting period. For floating rate liabilities, the analysis is prepared assuming the amount of the liability outstanding at the end of the reporting period was outstanding for the whole year. A 100 basis point increase or decrease is used when reporting interest rate risk internally to key management personnel and represents management's assessment of the reasonably possible change in interest rates.

If interest rates had been 100 basis points higher/lower and all other variables were held constant, the company's (Contracted Interest Rate on all the borrowing)i) profit for the year ended March 31, 2018 would decrease/increase by ₹ 59.62 lakhs (2016 - 2017: decrease/increase by ₹ 41.84 lakhs). This is mainly attributable to the company's exposure to interest rates on its variable rate borrowings; and

42.6 Credit risk management

Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in financial loss to the Company. Before accepting any new customer, the company evaluates the credit worthiness of the potential customers based on past history and other external inquiries as deemed appropriate. The company also obtains the necessary KYC documents from all the customer for assessing the credit quality and defines the credit limits accordingly. Limits and scoring attributed to customers are reviewed once a year. As at 31 March 2017, the carrying amount of the companies largest customer was 1449.84 lakhs (31.03.2016 - 429.64 lakhs, 01.04.2015 - 1601.01 lakhs)

42.7 Liquidity risk management

Ultimate responsibility for liquidity risk management rests with the board of directors, which has established an appropriate liquidity risk management framework for the management of the company's short-term, medium-term, and long-term funding and liquidity management requirements. The company manages liquidity risk by maintaining adequate reserves, banking facilities and reserve borrowing facilities, by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities. Note 42.7.2 below sets out details of additional undrawn facilities that the company has at its disposal to further reduce liquidity risk.

42.7.1 Liquidity and interest risk tables

The following tables detail the company's remaining contractual maturity for its non-derivative financial liabilities with agreed repayment periods. The tables have been drawn up based on the undiscounted cash flows of financial liabilities based on the earliest date on which the company can be required to pay. The tables include both interest and principal cash flows. To the extent that interest flows are floating rate, the undiscounted amount is derived from interest rate curves at the end of the reporting period. The contractual maturity is based on the earliest date on which the company may be required to pay.

Commentary:

The tables below include the weighted average effective interest rate and the carrying amount of the respective financial liabilities as reflected in the standalone balance sheet as an example of summary quantitative data about exposure to interest rates at the end of the reporting period that an entity may provide internally to key management personnel.

NOTE 56. First Time Adoption Indian Accounting Standards

The company has adopted Indian Accounting Standards (Ind AS) notified by the Ministry of Corporate Affairs with effect from April, 1, 2017, with a transition date of April 1, 2016. Ind AS 101-First-time Adoption of Indian Accounting Standards requires that all Ind AS standards and interpretations that are issued and effective for the first Ind AS financial statements which is for the year ended March 31, 2018 for the company, be applied retrospectively and consistently for all financial years presented.

Consequently, in preparing these Ind AS financial statements, the company has availed certain exemptions and complied with the mandatory exceptions provided in Ind AS 101, as explained below. The resulting difference of ₹ 757.95 lakhs in March 31, 2017 (₹ 518.47 lakhs in April 1, 2016), in the carrying values of the assets and liabilities as at the transition date between the Ind AS and Previous GAAP have been recognised directly in other equity.

(A) Set out below are the Ind AS 101 optional exemptions availed as applicable and mandatory exceptions applied in the transition from previous GAAP to Ind AS.

(i) Deemed cost

The company has opted para D7 AA and accordingly considered the carrying value of property, plant and equipments and Intangible assets as deemed cost as at transition date.

(ii) Leases

Appendix C to Ind AS 17, Leases, requires an entity to assess whether a contract or arrangement contains a lease. As per Ind AS 17, this assessment should be carried out at inception of the contract or arrangement. However, the company has used Ind AS 101 exemption and assessed all arrangements based for embedded leases based on conditions in place as at the date of transition.

(iii) De-recognition of financial assets and liabilities

De-recognition of financial assets and liabilities The company has elected to apply de-recognition requirements for financial assets and liabilities under Ind AS 109 prospectively for transactions occurring on or after the date of transition to Ind AS.

(iv) Classification and measurement of financial assets

(D) Effect of Ind AS adoption on the statement of cash flows

The Ind AS adjustments are either non cash adjustments or are recompanying among the cash flow from operating, investing and financing activities. Consequently, Ind AS adoption has no impact on the net cash flow for the year ended 31st March, 2017 as compared with the previous GAAP.

Notes to reconciliation

a. Trade and other Receivables

Under Previous GAAP, the Company has created provision for impairment of receivables only in respect of specific amount for incurred losses. Under Ind AS, impairment allowance has been determined based on Expected Credit Loss model (ECL).

b. Revenue Recognition - Measurement of Revenue

As per Ind As 18 revenue needs to be measured at fair value and accordingly provision for estimated returns is adjusted up front against revenue as against the practice of recording them on occurrence of the returns under the earlier GAAP.

c. Finance cost on interest free borrowing

Ind AS-109 requires all financial liabilities to be measured at fair value as against cost in the previous GAAP. Accordingly the difference between the fair value and the previous GAAP carrying value is accounted for as a finance cost over the period of the loan with a corresponding credit being shown as an equity contribution.

d. Incremental finance cost under EIR method

Under Previous GAAP, the Company accounted for long term borrowings at transaction value. Under Ind AS, the Company has recognised these long term borrowings initial at fair value less transaction cost and subsequently measured at amortised cost using effective interest rate (EIR).

This has resulted to an impact on equity as on 31st March, 2017 of ₹ 2.31 Lakhs and on 1st April, 2016 of ₹ 13.48 Lakhs.

e. Fair valuation of non-current security deposits

Under Previous GAAP, security deposits are carried at their book values. Under Ind AS, non cancellable deposits (other than statutory in nature) are required to be measured at their fair values at inception using an appropriate discounting rate.

f. Proposed dividend

Under previous GAAP, dividends on equity shares recommended by the board of directors after the end of the reporting period but before the financial statements were approved by shareholders were recognised in the financial statements as a liability. Under Ind AS, such dividends are recognised when declared by the members in a general meeting. In the case of the company, the declaration of dividend has occurred after period end. Therefore, the liability recorded for this dividend and tax thereon, has been derecognised against retained earnings.

g. Re-measurements of post employment benefit obligation

Under Ind AS, re-measurements i.e. actuarial gains and losses and the return on plan assets, excluding amounts included in the net interest expense on the net defined benefit liability are recognised in other comprehensive income instead of Statement of Profit and Loss. Under the previous GAAP, these remeasurements were forming part of the Statement of Profit and Loss for the year.

h. Revenue from operations & Excise Duty:

GUFIC BIOSCIENCES LIMITED

Under previous GAAP, revenue from sale of goods was presented net of excise duty on sales. Under Ind AS, revenue from sale of goods is presented inclusive of excise duty. Excise duty is presented in the Statement of Profit and Loss as part of other expenses. This has resulted in an increase in the revenue from operations and expenses for the year ended 31st March, 2017. The total comprehensive income for the year ended and equity as at 31st March, 2017 has remained unchanged.
